Institut des Sciences de la Réadaptation

*Basic information about the city of Limoges:*

Limoges is a city of more than 180.000 inhabitants, the leading economic center in Central-Western France, Limoges boasts some of the biggest names in industry: Legrand, a world leader in products and systems for electrical infrastructure for buildings, Bernardaud and Haviland porcelain, the famous Weston shoes, Renault trucks, etc.

Located at the crossroad of Spain and Northern Europe and the motorway linking Central Europe with the Atlantic,

**An innovative university** serving its students and the local community. 18,000. That's the number of students at Université de Limoges, a close-knit community that fosters learning. More than 350 diploma-granting programs are on offer. Université de Limoges provides the major university fundamentals as well as many other types of certification programs. Professional licences and Bachelor's degrees in technology target job market needs; Master's degrees train students for sophisticated sectors of activity. The course catalog is also rich in high-potential cross-disciplinary programs, sought-after engineering diplomas, and Doctoral schools that showcase university excellence.

Limoges hosts the main campus while satellite campuses extend to Brive, Tulle, Égletons and Guéret. These other sites offer specialized courses that take advantage of the region's natural resources. There, training courses and research focus on forests, the environment, water treatment, heritage and civil engineering.

#### **Over 600 researchers**

Université de Limoges is an open community that promotes scientific advancement and high-level research. With its cutting-edge laboratories and wide range of partners, it plays a role in creating the future. The University counts more than 600 researchers whose work focuses on a variety of topics including ceramics, cryptography, finance, electronics, management, the silver economy, sports and semiology.

Cross-disciplinarity is key. In this vein, Université de Limoges leads a regional collaborative project in Nouvelle-Aquitaine that brings together higher education institutions such as the École nationale supérieure d'art of Limoges (ENSA), the Institut d'Ingénierie Informatique of Limoges (engineering school 3IL), and the city's university hospital center..
